

Md Ahadul Haque

Software Engineer

 ahadulhaquenaim1@gmail.com

 01794187408

 [Ahadul Haque](#)

Skills

- **Languages & Frameworks:** JavaScript, Python, C/C++, Node.js, Express.js, FastAPI, Django, React.js, Next.js
- **Database & ORM Tools:** MySQL, PostgreSQL, SQLite, MongoDB, Redis, Sequelize, SQLAlchemy, Prisma
- **Backend & Systems:** REST APIs, GraphQL, Microservices Architecture, Server-Side Application Development
- **Frontend Tools:** HTML, CSS, Tailwind CSS, Bootstrap, React.js, Next.js, React Query, Redux Toolkit
- **Testing:** Unit testing with Jest (JS), pytest (Python)
- **Cloud & DevOps:** Docker, Google Cloud Platform (GCP), NGINX
- **Data & Workflow Orchestration:** Apache Airflow, n8n Workflow Automation, ETL Pipeline Development
- **Data Processing & Automation:** Pandas, BeautifulSoup4
- **Monitoring & Observability:** Prometheus, Grafana
- **AI & Intelligent Automation:** LLM Integration (Cloud & Local Models), Prompt Engineering, AI-Powered Workflow Automation.

Experience

Data Engineer

Volue Insight, Norway (via Cefalo Bangladesh LTD)

August 2024 – Present

Tools: Python, BeautifulSoup4, Pandas, Apache Airflow, Django, REST APIs, Docker, Grafana

- Collect, preprocess, and structure high-resolution power market data from diverse sources into standardized formats.
- Design, maintain, and enhance ETL pipelines to support forecasting models and energy market analytics.
- Implement new features within existing data workflows to improve reliability, scalability, and performance.
- Ensure data integrity and consistency across high-volume transformation processes.
- **Team Task Summarizer (AI-Driven Automation):** Developed a secure automation system to aggregate and summarize team updates from GitHub, Slack, and ClickUp using OAuth 2.0 integrations. Built a data processing pipeline leveraging local LLMs (Llama 3.2 and Gemma) with structured prompt engineering to generate high-accuracy summaries. Delivered consolidated AI-generated reports to Gmail with zero external API cost through secure local model execution.

Associate Software Engineer

Cefalo Bangladesh LTD

2023 – 2024

- **Automated Catalog Management:** Integrated ServiceNow with external service providers to automate request workflows, user data population, and approval processes, significantly reducing manual intervention.
- **Cefalo Movie Snap:** Engineered a scalable scraping system to extract Academy Award data from Wikipedia and enrich it via REST APIs; containerized the solution using Docker for deployment efficiency.
- **Blogger Platform:** Developed a responsive full-stack web application with JWT-based authentication and dynamic data sorting using React.js and Node.js.

Education

B.Sc (Engineering) in Information and Communication Technology (ICT)
Mawlana Bhashani Science and Technology University, Tangail-1902

2018 - 2023

Certifications

- **OWASP Top 10:2021 in Python – Secureflag**

Learning Path | Date: 10/09/2024 | Certification ID: e6de5204-de77-4cf2-ae6a-e5c8313e6ce7

- **Python Django – The Practical Guide – Udemy**

Date: 30/06/2025 | [🔗](#)

- **Complete React, Next.js & TypeScript Projects – Udemy**

Date: 09/11/2025 | [🔗](#)

- **Intermediate Secure Coding in NodeJS – Secureflag**

Date: 07/02/2026 | [🔗](#)

Awards & Achievements

- Participated in many national programming contests and Inter-University programming contests.
- ACM ICPC Dhaka Regional 2019,2020,2021.
- Solving over 1500 problems on Online Judge platforms.
- Best Player (Singles), Inter-Software Badminton Tournament 2025
